Read *Silent Spring* by Rachel Carson

ISBN# 0618249060 or 9780618249060

**Directions:** Read *Silent Spring* by Rachel Carson and then answer questions Parts 1 – 4 included below. The entire project needs to be typed, using 12-pt font, Arial or Times New Roman, double spaced. Please clearly label each part for a total of 4 parts. You must submit a hard copy on the first day of school. Late projects will not be accepted. We will discuss the project during the first week of class and after the discussion there will be an essay test on the book *Silent Spring*.

**PART 1 - Introduction**

Read former Vice President Al Gore’s introduction to Silent Spring at:

Read Chapter 1 of *Silent Spring*.

Answer the following Questions:

1. When *Silent Spring* first came out, Carson faced fierce opposition. Why, according to Al Gore, would people try to refute her research, and how did they try to do it?

2. Contrast Rachel Carson and Al Gore's view of humans' relationship with nature with the views of Carson's opponents. With whom do you agree and to what degree?

3. Using specific passages for support, explain what Al Gore thinks of the impact that Carson's book had on the world.

4. What did you learn about pesticide use, politics, and food growth from reading Gore's introduction?

5. What did this reading assignment teach you about the power of writing?

6. Obviously the issues that Carson raised in *Silent Spring* have not gone away. What do you feel you can do as a citizen to become part of a solution to these problems?

**PART 2 – Reading and Understanding**
Read the rest of the book *Silent Spring*. (This will take some time – pace yourself…maybe one chapter per night).

Answer the following questions:

1. Carson’s first chapter explains the title of her book. Why is it called *Silent Spring*?

2. Why does she suggest that chemical insecticides and herbicides be called “biocides”? What idea is she expressing by using this word? Is Carson opposed to the use of all toxins?

3. What is uniquely problematic about DDT and other chlorinated hydrocarbons?

4. How do toxins contribute to water pollution?

5. “In nature nothing exists alone” (p. 51). Why is this an important part of Carson’s critique? How would you characterize her view of the many relationships in nature: between human beings and their environments, between plants and animals, between water and earth?

6. What alternatives does Carson propose to the use of chemicals to control unwanted pests and plants? Do you think these alternatives make sense in the context of agribusiness?

7. Her description of chemical spraying suggests that moral dilemmas are involved in the use of toxins as well as technical problems of environmental management. What moral dilemma is Carson worried about? Do you share her view?

8. Carson’s discussion of Dutch Elm disease leads her to advocate “the conservation of variety.” What does she mean by this?

9. Why is runoff in rivers and the ocean such a serious problem?

10. What lessons does Carson extract from the stories about spraying for the gypsy moth and the fire ant? What was the role of local activists? Of government officials? Of the chemical industry?

11. What is Carson referring to when she writes that there is a “human price” for the use of toxins? Why is it so crucial that human beings begin to see themselves as an essential part of the natural world? Why did she believe that people resisted thinking about themselves in those terms?

12. Carson invokes the term “ecology” (p. 189) to describe “the web of life–or death...” What role does this concept play in her analysis?

13. Carson describes the possibility of genetic damage by environmental hazards as something new. She also discusses cellular damage caused by environmental carcinogens, an especially poignant example because Carson herself died of breast cancer. Do you think of these as novel, even controversial theories? Why or why not?

14. Do you agree that the project of controlling nature is arrogant, foolish, and dangerous, as Carson argues? Why or why not?

**PART 3 - Interpretation**

After reading the book *Silent Spring*:

Analyze the following quotes:

- Quote 1: “As crude a weapon as the cave man’s club, the chemical barrage has been hurled against the fabric of life.” – Rachel Carson, *Silent Spring*

- Quote 2: “The most alarming of all man’s assaults upon the environment is the contamination of air, earth, rivers, and sea... This pollution is for the most part irrecoverable.” – Rachel Carson

- Quote 3: “We won’t have a society if we destroy the environment.” – Margaret Mead

- Quote 4: “The rapidity of change and the speed with which new situations are created follow the impetuous and heedless pace of man rather than the deliberate pace of nature.” – Rachel Carson, *Silent Spring*

**PART 4 - Extension**

Interview a person who has lived in your home county for at least 20 years. Prepare a question list that includes literal and interpretive questions. You MUST include a brief “resume” of the person you are interviewing (name, where they have lived, and for how long), as well as your question list and their answers when you submit your hardcopy. Suggested questions might include:

1. How has our community’s environment changed over the time you have lived here?

2. What was the environment of our community like when you first lived here?

3. What changes made the greatest impact on the environment?

4. Have the changes been for the better? Why do you feel this way?

5. In retrospect, compare the benefits and detriments of the impact of people on the land.

Please do not hesitate to email me at jkraut@highlandschool.org if you have any questions about the summer assignment.
